

## Mozaik

Design by Mark Gabbertas

The Mozaik seating family is made up of three principal shapes. A small soft square stool and soft rectangular bench available in two heights and a large low soft square stool. The two heights of upholstered unit allow for different seating styles that in turn facilitate

different patterns of behavior, function and interaction. But their dual heights also suggest the function of the higher unit as a space division, a surface for a device, a support for the user's back or arm or a place to perch.
